

The Haivision and Akamai partnership provides a cloud-based video management system that allows customers to easily manage, publish and deliver high quality live and on-demand video over the Internet to viewers anywhere in the world in a fast, reliable and secure way. Haivision is a NetAlliance Digital Media Solution Partner and offers Akamai CDN solutions for the Haivision Video Cloud and Haivision Connect DVR.

“As a best-of-breed solution provider, Haivision seamlessly brings together a robust and superior video workflow solution, enabling its customers to maximize opportunities with video. Haivision is an ideal Digital Media NetAlliance Solution Partner.”

—John Sconyers, senior director of media channels at Akamai.

The **Haivision Video Cloud** is a cloud-based video content management system that helps organizations easily manage and publish live and on-demand video to websites, mobile devices and social media platforms. Content in the Haivision Video Cloud is contained within Akamai’s globally distributed cloud-based storage architecture adding high availability, scale, and even faster responsiveness to video content delivered over Akamai’s Content Delivery Network. The **Haivision Connect DVR** is a cloud-based service that connects multi-site organizations with time-shifted video playback.

The Akamai Intelligent Platform is seamlessly integrated as part of the Haivision Video Cloud and the Haivision Connect DVR end-to-end solutions. Haivision clients do not need to provision their own cloud storage or CDN services, and with Akamai, their media experience is being served by the most advanced, reliable and globally distributed architecture available. The result is to provide our customers’ viewers with the best possible video experience, bar none.

Customers

About Akamai

As the global leader in Content Delivery Network (CDN) services, Akamai makes the Internet fast, reliable and secure for its customers. The company’s advanced web performance, mobile performance, cloud security and media delivery solutions are revolutionizing how businesses optimize consumer, enterprise and entertainment experiences for any device, anywhere.

About Haivision

Haivision provides media management and video streaming solutions that help the world’s leading organizations communicate, collaborate and educate. Haivision is recognized as one of the most influential companies in video by Streaming Media and one of the fastest growing companies by Deloitte’s Technology Fast 500.

As an Akamai NetAlliance Digital Media Solution Partner, Haivision incorporates many products from Akamai's Web Performance and Media Delivery solutions, as part of the Haivision Video Cloud and Haivision Connect DVR for fast, reliable and secure video delivery anywhere in the world.

Haivision Video Cloud

Whether broadcasting a live event to audiences around the world or publishing on demand video across internal portals, company websites and mobile applications, the Haivision Video Cloud is a cloud-based video content manager that provides all the tools to get the right content, to the right audience, wherever they are at the highest quality.

Haivision works with your organization to create "set and forget" publishing workflows, all from within a comprehensive and intuitive web-based video content manager. The Haivision Video Cloud distributes your live and on demand video across multiple websites and social media platforms simultaneously, giving you more time to focus on content creation. Assets in the Haivision Video Cloud are stored and delivered via the Akamai Intelligent Platform, ensuring that response time for any user playout request is fast and of the highest quality.

Haivision Connect DVR

Haivision Connect DVR is a cloud-based service that connects multi-site organizations with time-shifted video playback to ensure the inspirational experience of your main campus is shared with consistency at remote or temporary locations, worldwide. Using low-cost Internet connections, this end-to-end solution brings together all the necessary components, integrating Haivision's high-quality KB encoder, Akamai's CDN, and the compact and powerful DVR remote appliances.
